PREVENT OBJECTS FROM FALLING THROUGH GRATINGS

DROPPED OBJECT PREVENTION MAT

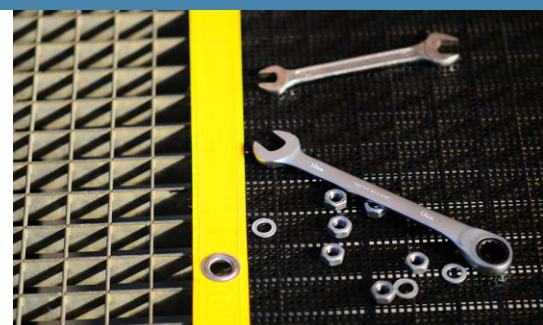

Bisafe Märkning & Industrisäkerhet AB

The **DROPPED OBJECT PREVENTION MAT** is a tool which is used on elevated platforms. It allows personnel to store their tools on a safe mat and will prevent objects falling through gratings while working at height.

When working at heights, dropped tools or other equipment pose a significant safety hazard. Safety at work is especially important when working on elevated work areas where personnel or contractors are working underneath. Dropped objects are unfortunately a common contributor to accidents in industrial facilities. The Dropped object prevention mat is a cost-effective and easy way to prevent such accidents from happening.

Key properties

- ✓ Dimensions of the mat: 220 x 120 cm;
- ✓ Cost-effective drop safety tool;
- ✓ Prevents tools and equipment from falling through gratings;
- ✓ Easy to carry and work on;
- ✓ Made of high-quality fabric;
- ✓ The safety color yellow hem around the mat secures the sides of the mat;
- ✓ Connects to the grating with elastic banded hooks;
- ✓ The mats are flame retardant (DIN 4102-1).

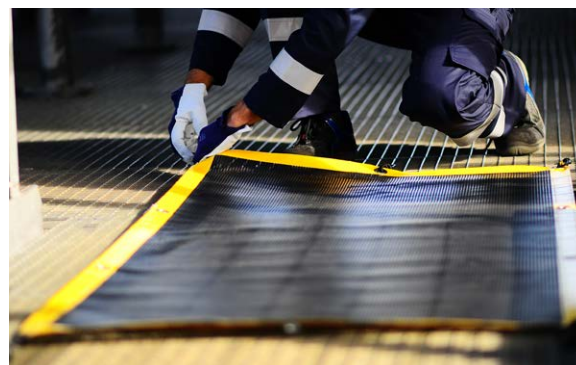

Additional safety

The mat is transparent, so holes or other hazards beneath it can easily be spotted and avoided.

A hole with its cover removed is not visible beneath this cloth. A potential safety hazard.

The hole is clearly visible here.
