INTREPID SAFETY PRODUCTS

**OUR STRENGTH IS YOUR SAFETY**

**TO CLOSE OFF OPENINGS WHERE REGULAR SAFETY GATES DON'T FIT**

## NARROW WALKWAY SAFETY GATE

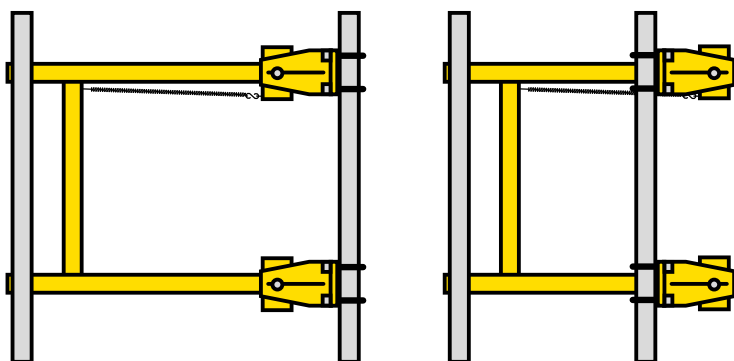

**Bisafe Märkning & Industrisäkerhet AB**

In certain cases, a regular safety gate does not fit because the walkway or platform is too narrow, or the gate can not open entirely because of space constraints. The solution here is our **NARROW WALKWAY SAFETY GATE (NWG)**.

The Narrow walkway safety gate is a spring-operated, stainless steel gate suitable for openings between 500 - 800 mm. The NWG is a reliable, easy to install self-closing safety gate.

### Key properties

- ✓ Safely closes off ladder openings, unlike chains or simple bars;
- ✓ Made of stainless steel 304, coated with RAL 1023 yellow;
- ✓ Meets the European standard EN ISO 14122;
- ✓ Can be used in tight or narrow spaces where regular safety gates don't fit;
- ✓ One size fits all: the gate is suitable for openings between 500 - 800 mm;
- ✓ Spring loaded (stainless steel 316) soft-close system;
- ✓ Maintenance free;
- ✓ Easy installation;
- ✓ Quick delivery from stock.

*Depending on how the gate's brackets are installed, the gate can be used for openings between 500 and 800 mm.*
