

FIRE ISOLATOR

Datasheet Fire Isolator Trolley bag

Product description

The T-ISS FireBlanket trolley is a compact and efficient solution specifically designed for transporting our Fire Blanket. Weighing around 40 kg when loaded, this trolley is easily maneuverable by a single person, thanks to its durable wheels and internal straps that secure the blanket in place.

The trolley is designed for quick access and emergency deployment and comes with an instruction manual. The Trolley also comes with a Velcro strip, allowing for easy opening and fast access to the Fire Blanket.

How to use

1. Place the bag with blanket in the front or behind the car.
2. Open the bag fully and loose the straps around the blanket.
3. Unfold the blanket in the width, the green loops must be at the top.
4. Take the green loops for the first part of covering the car lengthwise.
5. By pulling at the green loops, the first half of the car is covered.
6. Take the red or yellow loops (depending on which one is above) for the second step.
7. Pull the second part of the blanket over the car with a wave.
8. Straighten the blanket to make sure the blanket touches the ground around the car.
9. Moisten the blanket to make it nearly gas and smoke tight.
